Reviewer's report

Title: Predictor of Poor Coronary Collaterals in Chronic Kidney Disease Population with Significant Coronary Artery Disease

Version: 2 Date: 24 July 2012

Reviewer: Roberta Poletti

Reviewer's report:

I would only make a minor remark. Authors state that "we excluded patients with history of percutaneous coronary intervention (PCI)". Owing to this statement, we should assume that the any of 68% and 58.8% patients of poor collateral and good collateral group, respectively, who experienced previous ACS (table 1), underwent PCI?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
