Reviewer’s report

Title: Innate versus adaptive immunity in kidney immunopathology

Version: 1 Date: 27 May 2013

Reviewer: Alexander Rosenkranz

Reviewer’s report:

This commentary brings up the issue of inflammation in kidney diseases and links the innate with the adaptive immunity. This is an excellent comment describing an important area of research which will bring many changes in the upcoming years. I would only include a paragraph on acute kidney injury and inflammation to round up this issue.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
