Reviewer’s report

Title: The British Columbia Nephrologists' Access Study (BCNAS) - A Prospective, Health Services Interventional Study to Develop Waiting Time Benchmarks and Reduce Wait Times for Out-Patient Nephrology Consultations

Version: 2 Date: 24 June 2013

Reviewer: Delphine Tuot

Reviewer’s report:

Comments to the Editor and Authors
Schachter and colleagues have responded to all of my prior comments. The manuscript has been strengthened and the figures are clearer.

Major Compulsory Revisions: None.

Minor Essential Revisions: None.

Discretionary Revisions:
1. Table 3: May benefit from a title that emphasizes that these are consensus recommendations resulting from the Delphi process and the inputs listed in Table 3. (not solely the nephrology recommendations).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
