Reviewer's report

**Title:** Prevalence of Chronic Kidney Disease in diabetic adult out-patients in Tanzania

**Version:** 2  **Date:** 5 August 2013

**Reviewer:** Delphine Tuot

**Reviewer's report:**

The authors have responded to all of my prior comments and the manuscript has been considerably improved. The methods section is now much more robust. The writing is clearer and the authors make a better case for the importance of screening for CKD in the sub-saharan diabetic population. I have no further comments at this time.

**Level of interest:** An article of limited interest

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
