Reviewer's report

Title: Attitudes and perceptions of nephrology nurses towards dialysis modality selection: a survey study

Version: 2 Date: 28 June 2013

Reviewer: Anne Lee

Reviewer's report:

This is a well conducted and reported study with a balanced discussion.

Minor revisions: In the background there is referred to a survey in a qualitative, multicenter international study but a reference to the study is missing. The presented figures (graphs) are not optimal and investigating alternative ways of presenting might be worthwhile.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
