Reviewer's report

Title: The Efficacy and Safety of Lanthanum Carbonate on Chronic Kidney Disease Mineral and Bone Disorder in Dialysis Patients: A Systematic Review

Version: 2 Date: 6 August 2013

Reviewer: Francesco Locatelli

Reviewer's report:

For the authors:

The authors should delete the definition of new drug for Lantanum and Sevelamer because they are available since many years in many country moreover more caution should be used in saying that the bone concentration of Lantanum is safe on the long term the positive effect of Sevelamer on lipids and inflammation in comparison to Lantanum should be better underlined no discussion about the liver concentration and possible toxicity is presented Please correct "concent" in "content in many parts of the manuscript

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
