Reviewer’s report

Title: High dose intravenous iron, mineral homeostasis and intact FGF23 in normal and uremic rats

Version: 2
Date: 27 November 2013

Reviewer: Nosratola D. D Vaziri

Reviewer’s report:

The study is well designed and well executed, the results are of interest and address an important and interesting topic. There are a few minor grammatical and spelling errors which the authors can correct when they receive the galley proof.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
