Reviewer's report

Title: Pulmonary renal syndrome in a child with coexistence of anti-neutrophil cytoplasmic antibodies and anti-glomerular basement membrane disease

Version: 1 Date: 5 December 2012

Reviewer: Howard Dr. Trachtman

Reviewer's report:

1. The case is well described and the documentation is very complete. The authors might want to underline why a additional case report of the coexistence of ANCA and ant-GBM is important to publish. It would be of value to delineate how it impacted on diagnosis, treatment or delineation of prognosis.

2. The discussion is very long and could be reduced by about one-third

Figure 2 is not that helpful

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
