Reviewer's report

Title: Hemodialysis and hemodiafiltration differently modulate left ventricular diastolic function

Version: 4 Date: 16 March 2013

Reviewer: Tomasz P Stompor

Reviewer's report:

Major Compulsory:
No more major compulsory minor and discretionary comments. Authors addressed most of my concerns adequately. This however does not change my general view that the conclusiveness of the paper is limited due to short observation period and small study group.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
