Reviewer's report

Title: The effect of oral supplementation with a combination of beta-hydroxy-beta-methylbutyrate, arginine and glutamine on wound healing: A retrospective analysis of diabetic haemodialysis patients

Version: 4 Date: 20 September 2012

Reviewer: Jose D Méndez

Reviewer's report:

Comments:
Just minor corrections are suggested:
2. Methods. Assessments. Pag. 6. Line 5. If it is possible, add a reference related to a Bates-Jensen procedure or write in a few works the procedure followed (after Table 1).
   Treatment, Pag. 6. Line 11. It is not clear if the patients received twice the same mixture per day.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
