Reviewer's report

Title: Is the staple diet eaten in Medawachchiya, Sri Lanka, a predisposing factor in the development of chronic kidney disease of unknown etiology? - A comparison based on urinary beta2-microglobulin measurements

Version: 2 Date: 15 June 2014

Reviewer: Keith Levine

Reviewer's report:

The revised manuscript is stronger in content and style that the original submission, and the authors have appropriately responded to reviewer comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
