Reviewer's report

Title: Early identification of people with autosomal dominant polycystic kidney disease: a cross sectional study

Version: 1 Date: 16 August 2014

Reviewer: Tevfik Ecder

Reviewer's report:

Minor Essential Revisions:
1. Abstract. Line 1: The word "disease" should be moved between "kidney" and (ADPKD).
2. Abstract. Line 2: The word "new" should be deleted.
3. Abstract. Results. Line 3: The word "area under" is repeated. It should be deleted.
4. Background. Line 2: Instead of "....and results....", it would be better to write "... and may result....."
5. Background. Reference 6 at the end of the first paragraph is not the appropriate reference.
6. Which formula is used for the calculation of eGFR?
7. How many ADPKD patients are included in the study? In the abstract it is written as 225. In the text, it is 255.
8. The references should be written in a standard format.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
