Reviewer's report

**Title:** The IgA nephropathy Biobank. An important starting point for the genetic dissection of a complex trait

**Version:** 2 **Date:** 12 October 2005

**Reviewer:** Ichiei Narita

**Reviewer's report:**

General
I do not have any specific comment. The project described in this paper is interesting and important in this area. Therefore, it is now acceptable.

-------------------------------------------------------------------------------------------------------------------

**Major Compulsory Revisions** (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------------------------------------------

**Minor Essential Revisions** (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------------------------------------------

**Discretionary Revisions** (which the author can choose to ignore)

-------------------------------------------------------------------------------------------------------------------

**What next?**: Accept without revision

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No

**Declaration of competing interests:**
