Reviewer's report

Title: Time course study of oxidative and nitrosative stress and antioxidant enzymes in K2Cr2O7-induced nephrotoxicity

Version: 4 Date: 8 March 2005

Reviewer: Leonard Rybak

Reviewer's report:

General

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The authors have responded well to concerns raised in the previous review in this revision. There are a few minor grammatical errors that need to be corrected in the final version (e.g., p. 11, line 25, "Interestingly, the renal damage disappeared in spite of the kidney still had high levels..." should state "in spite of the kidney still having high levels...")

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:
