Reviewer's report

Title: Progressive neurological disease induced by tacrolimus in a renal transplant recipient: Case report.

Version: 1 Date: 15 December 2005

Reviewer: Maria Piera Scolari

Reviewer's report:

General

-major revisions (that the author must respond to before a decision on publication can be reached)

-essential revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-discretionary revisions (which the author can choose to ignore):

The Authors should describe if there are, or are not, any particular details regarding the neurological problems in his past (family history, personal history).

What next?: Accept after discretionary revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
