Reviewer’s report

Title: Therapeutic effect of all-trans-retinoic acid (at-RA) on an autoimmune nephritis experimental model: role of the VLA-4 integrin

Version: 2 Date: 15 January 2007

Reviewer: David Power

Reviewer’s report:

General
The Authors have satisfactorily addressed the concerns previously expressed.

====================================================================================================

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

====================================================================================================

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

====================================================================================================

Discretionary Revisions (which the author can choose to ignore)

====================================================================================================

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
