Reviewer's report

Title: Moderate to Severe Traumatic Brain Injury Self-Reported Long Term Outcomes: A Gender Based Analysis

Version: 2 Date: 4 October 2010

Reviewer: Brian Zink

Reviewer's report:

Major Compulsory Revisions:

The authors responded to the critique of improper reporting of the Bonferroni modification for their statistical comparisons by providing an analysis and correction factor that sets the new significance level at $p \leq 0.02$. However, $p$ values greater than this are still reported as "significant" in the results - page 8, first paragraph, last sentence and page 8, second paragraph, last sentence. Also, Tables 2 and 3 continue to have parameters in bold typeface, indicating that they are statistically significant, when they have $p$ values that are greater than 0.02.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
