Reviewer's report

Title: Synesthesia and Migraine: Case Report

Version: 2 Date: 11 October 2010

Reviewer: Michael Marmura

Reviewer's report:

It appears that the essential revisions were made and the paper certainly reads a lot better.

There are a few spelling/grammatical errors as follows:

In the case report change to "She had no other types of ....."
In the discussion change to "... neuronal hardware is required for this to happen is unknown."
"... more difficult to explain." (remove the quotes)
"Based on the prevalence of synesthesia in the general population, about 2 in 1000 ..."

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
