Reviewer's report

**Title:** Percutaneous radiofrequency lesions adjacent to the dorsal root ganglion alleviates spasticity and pain in children with cerebral palsy: pilot study in 17 patients

**Version:** 3  **Date:** 9 May 2010

**Reviewer:** Gunnar Hagglund

**Reviewer's report:**

The authors have answered all six comments and questions adequately, and they have made changes in the manuscript according to my concerns. I do not have any further suggestions for revisions.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
