Reviewer's report

Title: Mutational spectrum of the SPG4 (SPAST) and SPG3A (ATL1) genes in Spanish patients with hereditary spastic paraplegia

Version: 2 Date: 17 August 2010

Reviewer: Filippo M. Santorelli

Reviewer's report:

The report has been improved significantly. I have no major concerns or critique. Authors should try to report mutations consistently: use either a single letter (e.g., p.L195V) or a more canonical abbreviation (e.g., p.Leu195Val).

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests: I declare that I have no competing interests
