Reviewer’s report

**Title:** Evaluation of the endoplasmic reticulum-stress response in eIF2B-mutated lymphocytes and lymphoblasts from CACH/VWM patients

**Version:** 2  **Date:** 13 September 2010

**Reviewer:** Mark Peter Ashe

**Reviewer’s report:**

I am happy that the authors have responded to the vast majority of my concerns. I was a little disappointed with the overview/explanation of the results section that I requested should be added to the discussion. I would urge the authors to expand this such that they provide some coherent possible explanations for their results.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
