Reviewer's report

Title: Rationale and design of a prospective study: Cervical Dystonia Patient Registry for Observation of OnaBotulinumtoxinA Efficacy (CD PROBE)

Version: 1 Date: 27 October 2011

Reviewer: Peter Nigel Leigh

Reviewer's report:

This is fine- not a clinical trial but a useful register that should provide insights to improve clinical practice. A Consort diagram might help to visualise patients screened, excluded, and completing at the various time points.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
