Reviewer's report

Title: Cognition after malignant media infarction and decompressive hemicraniectomy

Version: 3 Date: 14 April 2011

Reviewer: Eric Jüttler

Reviewer's report:

Dear authors,

there has been a clear and extensive revision of the manuscript according to questions and comments that have been given. Most questions are answered sufficiently, for others are resonable answeres are given.

There has obviously been a professional language editing. However, one term needs to be changed: I think you mean "nursing home" instead of "nursery home" (Kindergarten)

I have no further comments and recommend publication in BMC Neurology.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
