Reviewer's report

Title: The effect of static scanning and mobility training on mobility in people with hemianopia after stroke: a randomised controlled trial.

Version: 1 Date: 20 April 2011

Reviewer: Jeanne Teitelbaum

Reviewer's report:

This is a good study protocol description that will answer an important question. I would want to see a more detailed description of the rehabilitation method that will be used, with a review of any previous studies looking at performance.
