Reviewer's report

Title: Effects of light deprivation on visual evoked potentials in migraine without aura

Version: 1 Date: 6 July 2011

Reviewer: Zaza Katsarava

Reviewer's report:

The authors studied VEP habituation in healthy people and migraine patients. They investigated effects of light deprivation on habituation pattern. This is an important contribution of our understanding of an fairly used technique. The study is well designed, properly done and well written.

I have no additional comments

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
