Reviewer’s report

Title: A single-blinded trial of methotrexate versus azathioprine as steroid-sparing agents in generalized myasthenia gravis

Version: 2 Date: 25 June 2011

Reviewer: Kimiaki Utsugisawa

Reviewer’s report:

I feel that the authors have well revised the paper. Although there remain to be some minor problems in writing, I believe no need to re-review the further revised version.

Trivial mistakes:
1. ‘Quantified’ MG Score (QMGS) should be read as ‘quantitative’ MG score (footnote of Table 2).
2. ‘Seronegative’ should be read as ‘AChR-Ab-negative’. (page 5).
3. There is no indication of (%) (Failures in Table 2).
4. Is there any use of the Mann-Whitney U-test?

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
