Reviewer's report

Title: Transdermal rotigotine for the perioperative management of restless legs syndrome

Version: 2 Date: 10 July 2012

Reviewer: Marcia Pradella-Hallinan

Reviewer's report:

I carefully revised the article "Transdermal rotigotine for the perioperative management of restless legs syndrome" by Birgit Högl, Wolfgang H Oertel, Erwin Schollmayer and Lars Bauer and believe that all the questions that I asked were answered. The text as it now stands is more accessible, with unequivocal purpose, results and conclusions applicable to set objectives.
