Reviewer’s report

Title: Recurrent aseptic meningitis revealing Kikuchi-Fujimoto disease: case report and literature review

Version: 1 Date: 26 August 2012

Reviewer: Samir Amr

Reviewer’s report:

1. The references are out of order. They do not match what is written in the article.
2. In background paragraph, reference 5 is cited as being from the Japanese literature, but it is a paper from India.
3. In the table, case 3 and case 4 citations are wrong. They should be references 6 and 7 instead of references 8 and 9.
4. Proper English language editing.
5. Figure 1A is out of focus.
6. In the case presentation part and in the pathology section on immunohistochemistry, rephrasing the results should be .. histiocytes were positive for CD68 and myeloperoxidase.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
