Reviewer's report

Title: Pretreatment with Intrathecal Amitriptyline Potentiates Anti-Hyperalgesic effects of Post-Injury intra-peritoneal Amitriptyline following Spinal Nerve Ligation

Version: 5 Date: 28 February 2012

Reviewer: jana sawynok

Reviewer's report:

The authors have responded diligently to previous issues raised by referees, and this manuscript is much improved from before. The report contains novel and original data, and it merits publication.

There are a few minor items that require correction.

page 3, line 15: hypersensitivity not "hyper-sensitivities" (elsewhere in the manuscript the authors correctly use hypersensitivity)

page 15, line 14: reversal not "reverse"

page 17, line 9 understood, they may involve (the subject of the sentence is "mechanisms" which is plural)

page 18, line 4: the effects of systemic (not "on")

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
