Reviewer's report

Title: Patient adherence to and tolerability of self-administered interferon beta-1a using an electronic autoinjection device: a multicentre, open-label, phase IV study

Version: 2 Date: 19 December 2011

Reviewer: Antonio Bertolotto

Reviewer's report:

Authors assessed the short-term adherence and tolerability of INFb 1a administered via electronic autoinjection device in patients with RRMS.

Methods were appropriate and well described. The study endpoints were well described.

The discussion was balanced and supported by the data from results. The authors clearly acknowledged any work upon which they are building, both published and unpublished. The title and abstract accurately convey what has been found. The writing is acceptable.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
