Reviewer's report

Title: Th1/Th2 cytokine profile in relapsing-remitting multiple sclerosis patients treated with glatiramer acetate or natalizumab

Version: 1 Date: 10 July 2012

Reviewer: Thomas F Scott

Reviewer's report:

There are too few studies such as this, examining T cell functions in actual MS patients rather than in EAE. The 2 drug comparator paradigm works well, and the findings are largely confirmatory of previous work, but remain important.

The authors should list the n for each group in the abstract.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
