Reviewer’s report

Title: Emerging Pharmacotherapy for Cancer Patients with Cognitive Dysfunction

Version: 1 Date: 21 February 2013

Reviewer: Wolfgang Grisold

Reviewer’s report:

This is an interesting and useful overview on current drugs used in cognitive impairment and decline in cancer patients.

I have only 2 queries:

1) The authors often analogously use cognitive decline, and effects of drugs in dementia. This is not necessarily the same. A note should be implemented to make this clear.

2) Radiation effects are described in more detail than quoted by the authors

3) Biologa potentially can cause impairment of cognition (interferons)

Several spelling and typos.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
