Title: Etiologic subtype predicts outcome in mild stroke: prospective data from a hospital stroke registry

Version: 2 Date: 17 August 2013

Reviewer: Ana Faustino

Reviewer’s report:

-Minor Essential Revisions: 7 comments

Abstract:
1. spelling errors that must be corrected: “repufusion therapy”
2. The presented results (RR=0.412#95%CI 0.202#0.842) show that small vessel occlusion should be described as protective and not as predictor of death or disability at 3rd month. Please Correct.
3. The rate of death or disability at 3rd month should be presented in the abstract.

Background
4. spelling errors that must be corrected: “the most effecitve treatment”;

Methods:
5. Statistical Analysis: please specify how were statistically processed the missing values;

Results
6. NIHSS on admission and modified Rankin Scale score for study population should be presented in this section.

Conclusion:
7. Spelling errors that must be corrected: “repufusion therapy”.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
