Reviewer’s report

Title: Reproducibility and accuracy of optic nerve sheath diameter assessment using ultrasound compared to magnetic resonance imaging

Version: 2 Date: 5 August 2013

Reviewer: andreas karabinis

Reviewer’s report:

I notice:

1. interesting results between correlation echo diameter of optique nerve and MRI mesures and clinical application

2. But little sample (only 15 healthy volunteers)

3. In my experience the measurement depth is 5 mm behind the papilla and not 3 mm (anatomical reason)

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
