Reviewer's report

Title: Association between multiple sclerosis and epilepsy: large population-based record-linkage studies

Version: 3 Date: 19 September 2013

Reviewer: Heather Spader

Reviewer's report:

This is solid study looking at the relationship between MS and epilepsy. The methods are sound and the authors are drawing from a large database from which they have experience gathering data from previous study. It is clearly presented with a discussion that details the possible reasons for this relationship.

Minor Essential Revision
Please explain what day case care is.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
