Reviewer's report

Title: Modifications of longitudinally extensive transverse myelitis and brainstem lesions in the course of neuromyelitis optica (NMO). A population-based, descriptive study.

Version: 5 Date: 13 March 2013

Reviewer: Mohammad Ali Sahraian

Reviewer's report:
The authors have answered all my questions and the paper could be accepted.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
'I declare that I have no competing interests'
