Reviewer's report

Title: Is tinnitus accompanied by hemifacial spasm in normal-hearing patients also a type of hyperactive neurovascular compression syndrome? A magnetoencephalography study

Version: 5 Date: 15 April 2013

Reviewer: Steffen SR Rosahl

Reviewer's report:

The manuscript is better understandable by now.
In the last sentence of the abstract, you need to exchange "facial spasm" with "pathologic facial nerve activity".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests.
