Reviewer's report

Title: Paradoxyical Worsening Of Seizure Activity With Pregabailin In An Adult With Isodicentric 15 (IDIC-15) Syndrome Involving Duplications Of The GABRB3, GABRA5 And GABRG3 Genes.

Version: 3 Date: 20 March 2013

Reviewer: Amber Hogart Begtrup

Reviewer's report:

Minor essential revisions: In the abstract and paragraph 3 of the introduction the author's should list both GABRB3 and GABRG3 genes (italicized) instead of B3-G3 symbols to improve clarity.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No competing interests to declare.
