Reviewer's report

Title: Exome sequencing reveals a novel TTC19 mutation in an autosomal recessive spinocerebellar ataxia patient

Version: 4 Date: 19 November 2013

Reviewer: Daniele Ghezzi

Reviewer's report:

In the revised version, Morino et al. made amendments that fulfil most of my requests.

In my opinion, from the scientific side the manuscript is now suitable for publication.

It still needs some language corrections or the revision by an English native speaker.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
