Reviewer's report

Title: Painful Ophthalmoplegia with Normal Cranial Imaging

Version: 2 Date: 31 December 2013

Reviewer: Ping-Kun Chen

Reviewer's report:

Thanks for your revision. The authors revised the manuscript carefully and adequately responded to my previous questions. I have only two minor recommends.

Minor Essential Revisions
1. Page 13, line 6-8. Please re-check the glucocorticoids treatment in "episode of attacks" or "number of patients". 24 cases, 88.9% seems mean 24 episodes of 27 attacks. However, 13 cases, 54.2% seems mean 13 of 25 patients.
2. Page 17, line 17, should be ICHD-2 criteria

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
