Reviewer's report

**Title:** Impact of urinary incontinence on health-related quality of life, daily activities, and healthcare resource utilization in patients with neurogenic detrusor overactivity.

**Version:** 1  
**Date:** 22 October 2013

**Reviewer:** Xavier GAME

**Reviewer's report:**

The authors report a very interesting and quite important study. However, I wonder why the number of patients was so low whereas the data came from a multinational cross-sectional survey. Why only 27.5% of the included patients were from the US?

Do you know if the continent patients took any treatment for NDO? If so, what was it?

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
