Reviewer’s report

Title: Cerebral hypoxia, missing cortical somatosensory evoked potentials and recovery of consciousness

Version: 2
Date: 23 December 2013

Reviewer: Emily J. Gilmore

Reviewer’s report:

Overall, the authors do a great job addressing the previous concerns by this reviewer. The report is more clear and thus easier to follow as a story.

Minor essential revisions:
There are a few minor spelling mistakes and misuse of prepositions. Just needs to be copy-edited and it should be ready for publication.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
