Reviewer's report

Title: Deflazacort for the treatment of Duchenne Dystrophy: A systematic review

Authors:

Craig G.N. Campbell (craig.campbell@lhsc.on.ca)
Pierre Jacob (jacob@cheo.on.ca)

Version: 3 Date: 14 Jul 2003

Reviewer: Walter Deville

Level of interest: A paper whose findings are important to those with closely related research interests

Advice on publication: Accept without revision

The authors have answered to all my comments and they revised the manuscript where necessary. All compulsory revisions have been addressed. All discretionary revisions have been addressed, but we disagree on the wording mentioned in point 2 and the meaning of the phrase "would suggest a clinically and statistically benefit". This point should not refrain the editors from publishing the manuscript.
