Reviewer's report

Title: Effects of age and leg length upon central loop of the Gastrocnemius-soleus H-reflex latency

Version: 2 Date: 1 August 2004

Reviewer: Riccardo Mazzocchio

Reviewer's report:

General
The paper is now much improved in the way it has been organized. The purpose is clear and the discussion is more articulated.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

No major revision is needed

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

I should omit in the Discussion the sentence on the Chinese work and authors(Suffice to quote the article). Also please avoid sentences like .."thanks to Mazzocchio et al.." To report the finding and quote the reference is enough!

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No

Declaration of competing interests:
