Reviewer's report

Title: Magnetic Resonance Spectroscopy of normal appearing white matter in early relapsing-remitting MS. Disability-spectroscopy correlations.

Version: 2 Date: 4 May 2004

Reviewer: Massimo Filippi

Reviewer's report:

General
They dealt satisfactorily with my comments

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

They dealt satisfactorily with my comments

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

They dealt satisfactorily with my comments

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No
