Reviewer’s report

Title: Prevalence of Abnormal Findings on Brain Magnetic Resonance (MR) Examinations and the Usefulness of Brain Docking in Annual Medical Check-ups

Version: 4 Date: 8 August 2005

Reviewer: Brian E Chapman

Reviewer’s report:

General

I am satisfied that the revisions to the manuscript adequately describe the review methods used and state more completely study limitations.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No

Declaration of competing interests:

I declare that I have no competing interests.
