Reviewer's report

Title: Potential risk factors of diabetic neuropathy: a case control study

Version: 3 Date: 5 October 2005

Reviewer: Satoshi Kuwabara

Reviewer's report:

General

The manuscript has been improved by adding results of multivariate logistic regression analysis, but still needs minor revisions.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

In Abstract, Results, and Table 3, does "p value of 0.000" means "p<0.001"?

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes
