Reviewer's report

Title: Monthly i.v. methylprednisolone in relapsing-remitting MS - Reduction of enhancing lesions, T2 lesion volume and plasma prolactin concentrations

Version: 2 Date: 10 May 2006

Reviewer: Marino Zorzon

Reviewer's report:

General
The Authors addressed the points that I raised and modified the text accordingly. Their explanation letter was satisfactory. I would recommend publication of the paper as it is.

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

-----------------------------------------------------------------------------------------------

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
