Reviewer's report

Title: Perception of Stroke and Knowledge of Potential Risk Factors among Omani Patients at Increased Risk for Stroke.

Version: 2 Date: 18 September 2006

Reviewer: Desmond O'Neill

Reviewer's report:

General
While this is still an interesting regional/national paper, the authors still have not really developed the level of discussion and context that would truly merit a place in an international journal.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)
