Reviewer’s report

Title: Epidemiology of smoking during pregnancy among Canadian women: A national survey

Version: 2 Date: 25 October 2009

Reviewer: Marleen Temmerman

Reviewer’s report:

Nice paper, very timely as smoking seems to be on the rise in pregnant women

The paper is well written en deserves publication. One minor question: could the fact that the interviews are conducted by phone lead to a bias in Canada? In other words what is the proportion of the population with/without phone?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
